LABWARE

LABWARE

Bluetooth®

- 9 mm thick and weighs 115 grams
- 3.8 inch TFT touch screen
- Long range Bluetooth® 250 meters

The smallest, lightest waiter terminal in the world, Nano has pre-installed hospitality applications to simplify integration with your solution.

Slim and desirable,

Nano adds value to your system.
9 mm thick and weighing 115 grams, including battery, Nano has a full colour 3.8 inch TFT touch screen with menu pictures and secure Bluetooth® EDR 2.0 communication with up to 250 meters operating range.

Practical and reliable

Drop resistant, splash proof and easy to use with just one hand, Nano is the professional tool for taking orders at the table and sending them wirelessly to kitchen and bar.

Small but powerful

Nano fits easily into a shirt pocket or the top pocket of a waiter's jacket and can be attached by lanyard to avoid it being mislaid. It has a battery life of 48 hours continuous use.

Integration with 3rd party software

Nano is not a PDA. It comes with pre-installed fully functional hospitality applications and menus.

Your programmers can integrate Nano with your solution using the Software Development Kit which is available when you complete a non-disclosure agreement. The Kit includes one Nano, one Bluetooth access point and configuration tools.

Support from the manufacturer

Nano is a 4th generation handheld terminal manufactured by Labware Systems S.p.A. of Italy. Geller resellers will receive technical support directly from the manufacturer during the integration process and afterwards as necessary.

Versatile and connectable

Labware's DLL sits between your Windows application and Labware's Bluetooth access point. It is compatible with .NET, VB6, C++, C#, Visual FoxPro, WinDev and Delphi.

Labware provide demo server software based on the DLL together with the source code which greatly simplifies and speeds up the software integration.

Nano inbuilt functions include

- Enter a new order
- Enter the number of covers
- Enter condiments/ingredients
- Enter cooking instructions
- Add free text messages
- View the order or bill
- Change the PLU quantity
- Change the PLU price
