Advanced EPOS technology
with the ease of use and price
of a cash register

GELLER

The SX Pro Series is a range of 3 professional terminals specifically designed to meet the demanding requirements of today's hospitality and retailing business at the point of sale.

SX-585 Pro

Designed primarily for retailers, the SX-585 Pro is a stand-alone cash register with a raised keyboard that can operate as a highly featured but simple to use keyboard entry ECR.

Alternatively, SX-585 Pro can function as an entry-level EPOS system with scanning for 20,000 price look-ups and connection to David Professional Sales & Management Software.

SX-595 Pro

SX-595 Pro has the same specification as SX-585 Pro but has a spill-resistant, 173-position flat keyboard.

Although most popular with hospitality users, many retailers who do not use David Professional Software to make price and product name changes via a PC, also prefer the flat keyboard. They use it like a typewriter to enter product names using the extra buttons on the flat keyboard.

SX-695 Pro

Although more highly featured, SX-695 Pro has the same housing as the SX-595 Pro.

Additional to all the features of the other models in the Pro range, SX-695 is capable of inter register communication. Up to eight SX-695 can link to each other in the same system for consolidated management reporting.

Up to four kitchen/bar printers can be shared in the network and there is an option of magnetic server lock and keys.

As a fail-safe option, sales and programming data can be automatically backed up to an SD card by user defined frequency.

Other SX-695 features include cash back, CCTV link and graphic logo.

David Professional Software

David Professional Software can be single or multi-site and operate in-house or remotely via the Internet.

It handles all system set-up and programming and provides sophisticated reporting for management. If required, David Professional can be set to send automated, pre-programmed email alerts - say, for voids, discounts or paid out transactions over a certain amount. It can also send end-of-day reports to the proprietor's mobile phone when he is absent from the business.

The SX Pro Series - Good looking and functional

The textured wipe-clean, semi-matt finish is attractive, durable and does not show finger marks.

The 10 digit alphanumeric front and rear displays describe all items by name and give user friendly prompts to staff to ease and speed service. The hi-tech 'drop and load' printer mechanism, with separate 58 mm thermal receipt and audit rolls, simplifies and speeds paper roll changes and eliminates paper jams. There is no ribbon to replace or fade, so receipts of the same exceptional clarity are produced every time.

The drawer can be sited remotely under the counter for an appealing, low-profile appearance. Two RS-232 ports for scanning and/or PC connection are hidden at the rear with intelligent cable management so there are no unsightly wires on view.

Up to 4 scrolling messages display promotions or information to your customers between sales.
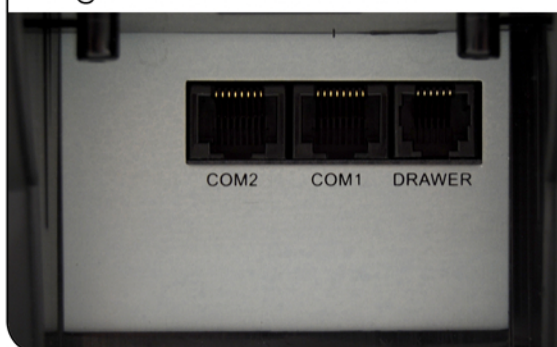

A few general SX Pro range features

- Soft keyboard (any function in any position)
- Easy name and price change
- Fast tendering keys (£5, £10, £20, £50)
- Drop and load paper receipt/audit roll change
- Training mode for new staff
- Foreign currencies
- Low profile, space saving design with option of remote cash drawer
- Two RS232 communication ports for programming the terminals and linking to back office PC and/or scanner

Some SX Pro range security features

- Cash lift alarm warns when cash in drawer exceeds pre-programmed amount
- Password protection for security sensitive operations
- Compulsory closed drawer
- Compulsory server ID
- Powerful management reporting
- Age verification feature

Hospitality features include

- Menu windows
- Auto timed Server Hold for 40 servers (40 servers can use and store orders at the same time)
- Half Pints and Doubles

The 173-position flat keyboard is large enough to be used as a one-touch operation for food and drink items.

In bars and pubs, the server interrupt feature allows up to 40 servers to make sales and store orders simultaneously.

Drink and food tickets can automatically be issued by the integral printer for issue to kitchen and bar.

The sophisticated table management system permits transfer of orders from bar to restaurant and produces guest checks with separations for starters, main courses and desserts.

SX-595 Pro and SX-695 Pro produce similar guest checks and can produce food and drink tickets from their integral printers. Additionally, Model SX-695 Pro can link to up to 8 other SX-695 Pros and up to 4 kitchen bar printers.

Retailing features include

- Bar code learning with pre-loaded general retailing product file
- Up to 40 Servers by ID number
- Customer hold and clerk interrupt
